

Pedagogical Deep Dive Series

A new Earth conversation is a transformative climate initiative at Clark University

We have, as a planet, entered a time of profound reckoning.

Given the gravity and uncertainty of our situation, the work of higher education must change.

A new Earth conversation

is our response to the challenge of these times.

Through a collective process of inquiry, listening and discernment, new kinds of awareness, engagement and effective action become possible.

Date: Thursday November 7th

Time: 11:45-1:15

Location: Fireside Lounge, Dana Commons

Lunch will be served.

RSVP to Laurie Ross ([RSVP Here](#)) by November 5th to get a count for lunch

CETL continues the **Pedagogical Deep Dive Series** with *A new Earth conversation* (NEC) **Collaborative Courses**.

Collaborative Courses are horizontal, emergent, and responsive to students' ideas and creativity. Faculty and students **co-produce** key course questions, activities, and outcomes.

This session will be moderated by Ellen Foley (IDCE), lead NEC convener, and include a faculty panel discussing their experiences teaching Collaborative Courses. We will explore the importance of faculty self-reflection and self-evaluation when engaging in new and potentially risky pedagogical practices.

Learn about resources available to transform your course into an NEC Collaborative Course.
